DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas C. Basso on 03/06/06.

The application has been amended as follows:

Claim 10 (Currently amended) A machine readable medium having stored thereon, a program for executing functions in a virtual space constructed on a network in which a plurality of users participate as respective avatars and have conversations with other users, the program comprising the functions of:

a managing function for managing data controlling feeling expressions generated for an avatar wherein the feeling expressions correspond to the conditions detected on the living body information of a user, and wherein said managing data includes at least one state condition and at least two levels associated with each of the at least one state conditions, wherein each of the feeling expressions are based on at least one of the conditions and one of the levels;

a storage control function for controlling storage of data on image displays of the avatar which correspond to the feeling expressions; and

a display control function for controlling the image displays of the avatar based on the storage of data on the image displays.

Allowable Subject Matter

1. Claims 1-27 are allowed over the prior art of record.

Applicant has claimed uniquely distinct features in the instant invention which are not found in the prior art either singularly or in combination. They are a virtual space information processing system for controlling the display of an avatar, the system comprising a detection device configured to collect living body information regarding a user; a condition manager communicatively coupled to the detection device to receive the collected living body information, the condition manager configured to store a plurality of state conditions corresponding to the collected living body information wherein each of the plurality of state conditions includes a plurality of levels; a feeling expression generated in response to one of the plurality of state conditions and one of the plurality of levels corresponding to the collected plurality living body information; and a data storage device for storing graphical data of the avatar that correspond to the generated feeling expression. These features are not found or suggested in the prior art.

The present invention is directed to a condition manager communicatively coupled to the detection device to receive the collected living body information, the condition manager configured to store a plurality of state conditions corresponding to the collected living body information wherein each of the plurality of state conditions includes a plurality of levels; a feeling expression generated in response to one of the plurality of state conditions and one of the plurality of levels corresponding to the collected plurality living body information; and a data storage device for storing graphical data of the avatar that correspond to the generated feeling

expression. Each independent claim is identified the uniquely distinct features "a condition manager communicatively coupled to the detection device to receive the collected living body information, the condition manager configured to store a plurality of state conditions corresponding to the collected living body information wherein each of the plurality of state conditions includes a plurality of levels; a feeling expression generated in response to one of the plurality of state conditions and one of the plurality of levels corresponding to the collected plurality living body information." The closest prior arts Liles and Skelly disclose a conventional system the sequence and time intervals determining a duration for displaying each visual frame of the sequence are indicated; either singularly or in combination, fail to anticipate or render the above underline limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cao (Kevin) Nguyen whose telephone number is (571)272-4053. The examiner can normally be reached on 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Cabeca can be reached on (571)272-4048. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
